

360°

TyMetrix 360°

- > Now scalable and affordable
- > Powerful analysis and budgeting tools
- > The secure option

TyMetrix 360°. The security you demand, with the clarity you need.

Legal departments in some of the world's leading companies are reducing costs and improving outcomes with TyMetrix 360°. It combines all your department's data in a single, secure platform that gives you tremendous visibility and clarity into your overall performance. And it offers some important cost and security benefits no other solution can promise.

Lower capital costs, spread over time.

Since TyMetrix is a web-based ASP, you'll take advantage of lower capital costs and eliminate system development, maintenance, and data storage.

Outstanding performance and uptime.

TyMetrix 360° is hosted on high-performance servers which, in combination with our extensive disaster recovery and fail-over services, allow us to offer our clients a commitment to exceptional uptime, reliability, and performance.

Seamless updates and improvements.

New enhancements and features are made available to you as they're developed. There's no need for IT intervention or client-side installation. Now you can choose the features that are important to your team.

Easier collaboration.

Foster teamwork and improve relationships between your department and outside counsel by creating a web-based "work room" for matter, document, and budget sharing.

Advanced security standards.

TyMetrix has made significant investment in the area of audit compliance. Our data center resides within a SAS 70 Type II and TruSecure-certified hosting facility featuring 24x7 monitoring and on-site security.

To find out how TyMetrix 360° can help you lower costs and improve outcomes, visit www.tymetrix360.net, call us at 860-549-8795, or send an e-mail to sales@TyMetrix.com. We'll be happy to schedule a full demonstration.
